

ASSESSING COVID-19 RISK IN MSBSD

MSBSD will monitor measures, trends, and patterns to assess and assign operational zones to communities. The definition of *community* can change based on virus transmission. If widespread transmission occurs, the community may be the entire Borough. If low to moderate transmission occurs, the community may be as specific as a single school site. All available information will be considered when making decisions.

Operational Zones

School mitigation plans for *Low*, *Medium*, and *High* risk statuses are available at matsuk12.us/covid.

Case Rates

7-day and 14-day case rates will be evaluated daily, along with test positivity rate data.

Absenteeism

Rates and trends will be evaluated regularly by various groups (school, grade, and classroom).

Health Advisory Team

MSBSD executive leadership, nurses, and a local physician will collaborate to provide direction.
