

HIGH SCHOOL PROGRAM OF STUDIES

2022-2023

**Matanuska-Susitna Borough School District
Office of Instruction
501 N. Gulkana Street
Palmer, AK 99645**

This draft contains all courses approved by the School Board from the Curriculum Council as of April 2022. All courses may not be offered at all high schools.

High Schools in the MSBSD

The Matanuska Susitna Borough School District is a district of choice with an “open enrollment” policy, which means that a school can accept boundary exemption requests from all MSBSD students who reside outside their boundaries, based on whether they have staffing and capacity. Since schools can receive over 200 boundary exemption requests each year, requests submitted before April 1st have the best chance of being accepted. However, students from out-of-boundary schools must provide their own transportation. Following is an overview of the high schools in the MSBSD.

[American Charter Academy \(K-12\)](#)

Diploma Requirements for Graduating Classes

The Chief School Administrator/Superintendent or designee shall prepare for Board approval a plan consisting of district graduation requirements. Students shall receive a Matanuska Susitna Borough School District diploma only after meeting the minimum credits defined for the graduation class outlined in Board Policy. Click below for the Board Policy Requirements.

[Graduating Class of 2023 & 2024](#)

[Graduating Class of 2025](#)

[Graduating Class of 2026 +](#)

High School Graduation Requirements - Graduation Standard Year (GSY)

The Graduation Standard Year is based on the first year a student begins high school as a 9th grader and would typically finish 4 years later. GSY is directly related to the Graduation Requirements that are part of the Credit Summary of the transcript. The graduation requirements for a student are based on what is set by the School Board when the student enters 9th grade (first year of high school).

Whether a student finishes early (i.e., Junior year or half-way through the Senior year) or late (i.e., fifth year Seniors), the Graduation Standard Year stays the same, as that is what determines the requirements they have to meet to graduate.

For additional information on high school graduation requirements [click here](#) to review AR 6146.01.

Grades/Evaluation of Student Achievement

The Superintendent or designee shall be responsible for implementing a uniform system of measuring, recording, and reporting the achievement of individual students. Principals shall ensure that student grades conform to this system. The grading system will ensure that the student, teacher, and the parents can assess progress toward the educational goals of a particular course of study. The Office of Instruction will review the grading system with relevant stakeholders on an as-needed basis.

Students shall be informed in writing at the onset of any course of study of the behaviors and achievements that are expected of them. They shall be kept informed of their progress during the course of study.

Whenever it becomes evident to a teacher that a student is in danger of falling below average, the teacher shall arrange a conference with the student's parent/guardian or send the parent/guardian a written notice.

Teachers are encouraged to allow for trends in the quality of student work. When a student finishes a grading period doing high quality work which requires skills acquired throughout the grading period, low grades at the beginning of the grading period need not diminish the appropriate evaluation of the student's achievement. Similarly, high grades at the beginning need not compensate for a downward trend in achievement.

A grade report to students and parents is required on a quarterly basis. These grade reports should go to the students within six working days after the end of the quarter. Final decision on any contested grade will be the responsibility of the principal.

For additional information on classroom grading practices, [click here](#) to review AR 5121.

Transcripts

High school transcripts are official documents and may be amended in extenuating circumstances to correct errors. Prior to requesting inclusion of Other Credit Options, including high school credit for courses taken during middle school, students and parents should consider the effect these non-weighted grades will have on class rank.

Grade Point Average (GPA)

A student's official transcript reflects both a weighted and unweighted cumulative GPA and Class Rank. A student may have a different class rank with each. An additional 1.0 quality point will be awarded to students in approved weighted grade courses who earn grades of A, B, C or D.

Standard Grade Points: A=4, B=3, C=2, D=1, F, NG and I = 0

Weighted Grade Points: A=5, B=4, C=3, D=2, F, NG and I = 0

The cumulative grade point average (GPA) is the weighted and standard grade points total divided by the total number of credits. Pass/Fail grades will not be counted in determining GPA or class rank.

Advanced Placement Courses (AP)

The Advanced Placement Program (AP) is a collaborative effort between motivated students, dedicated teachers, and committed high schools, colleges, and universities. The program allows students to take college level courses and exams, and to earn college credit or placement while still in high school. Most colleges and universities in the U.S. have an AP policy granting incoming students' credit, placement, or both on the basis of their AP Exam grades. Many of these institutions grant up to a full year of college credit (sophomore standing) to students who earn a sufficient number of qualifying AP grades.

AP Courses are developed by a committee of college faculty and AP teachers and cover the breadth of information, skills, and assignments found in the corresponding college courses. Each AP course has a corresponding exam that participating schools worldwide administer in May. Students may take AP courses with or without the exam option. AP courses are considered to have weighted grades.

International Baccalaureate Diploma Program (IB)

The International Baccalaureate (IB) Diploma Program is an internationally recognized academic program for high school juniors and seniors. Noted for its depth and rigorous curriculum, the Diploma Program aims to develop college-ready students who excel "physically, intellectually, emotionally and ethically" (ibo.org).

The Diploma Program (DP) is made up of six subject groups and the DP core: Theory of Knowledge, Extended Essay, and Creativity, Activity, Service (CAS). Students at Palmer High School can take IB classes based on their personal interests or can participate in the full diploma program.

IB classes at Palmer High School are available in all subject areas: Literature, Language Acquisition, Social Sciences, Experimental Sciences, Mathematics, and the Arts. Most IB classes award weighted grades.

In addition to college readiness, IB students often receive college credit, college waivers, and additional scholarship opportunities in recognition of the work they do in the IB program. For more information, visit www.ibo.org or www.matsuk12.us/phs.

Mat-Su Middle College School (MSMCS)

The Mat-Su Middle College School is a partnership between the MSBSD and the University of Alaska. The school is located on the University of Alaska, Mat-Su College campus. MSMCS's application is open to all juniors and seniors in the Mat-Su Borough. Applications are available prior to the beginning of each fall and spring semester. This school will support students to earn high school credits while taking college coursework. In addition to academic courses, students will attend an orientation program and receive a college readiness curriculum through structured support. This curriculum focuses on development of college readiness skills, abilities, and attitudes. Successfully completing college coursework will result in a student earning a MSBSD high school diploma and transferable college credits towards a future degree or certificate. MSMCS pays all tuition, fees, required textbooks, and materials for fall and spring semesters.

- Application required for admission
- Email: msm@matsuk12.us
- Phone: (907)761-3498
- Website: <https://www.matsuk12.us/msm>

Career and Technical Education (CTE)

Career and Technical Education (CTE) is organized around eight broad career areas. Nationally there are 16 federally recognized Career Clusters. MSBSD CTE consolidates the 16 Career Clusters down to 8 locally defined broad Pathways. Further, each Pathway has several CTE Programs of Study (CTEPS) under them. CTEPS defines a suggested sequence of courses aligned in increasing rigor as a student progresses through high school. Following a CTEPS prepares students for earning nationally recognized industry certifications, early college credits, and preparation for college entry and increased employment capacity. Students who follow a defined sequence of courses for at least 2.0 credits within a CTEPS are considered a CTE Concentrator.

CTSO's (Career and Technical Student Organizations) are an important part of the CTE programs. They are co-curricular and allow students to learn leadership skills and participate in civic projects as well as to showcase the industry skills they are learning. Current organizations are Business Professionals of America (BPA), Educators Rising, Future Farmers of America (FFA), Health Occupations Student Association (HOSA), and SkillsUSA. For more information, visit Alaska's state CTSO web site at <https://www.ctsos.org/wp-content/uploads/2015/02/Alaska.pdf>.

Dual-enrollment college credit, academic elective credit, and industry certifications are offered in many of our CTE courses. For up-to-date information on the aligned courses, please check the MSBSD website – [CTE Department College, Academics & Certs](#) or call the CTE Department Office at (907) 746-9274.

CTE is for **ALL** students!

Credit, Community, Career, College, (4Cs)

The 4Cs curriculum is designed to each grade's specific developmental needs. The lessons will focus on Credit, Community, Career, and College. Additionally, students will discuss safety, social and emotional development, and citizenship issues. The 4Cs class is intended to be a full year and is required for all students. Students will be taught how to explore, plan and follow-through on postsecondary plans. Lessons range from goal setting, career research, academic improvement, career surveys, college research, and high school academic planning. Presentations from industry experts, universities, colleges, and apprentice programs will be offered. Students will experience a more personalized learning environment with a structure and set of practices for monitoring and encouraging academic progress and career/college readiness.

All students will be provided a 4Cs mentor (teacher), counselor, and if needed, an upperclassmen peer who will meet with them weekly to monitor their academic success, emotional well-being, and progress in achieving their goals. Time will be set aside each day to provide students with structured study time and specific interventions if they are experiencing difficulty. For students who are excelling, they can earn additional time/credit for enrichment, acceleration, and/or work-based/community opportunities. Juniors and seniors can earn such privileges as off-campus and/or early release for work-based, community, or early college credit opportunities (based on passing all classes and good behavior). Upperclassmen taking on the role of a mentor (social or academic) for underclassmen during 4Cs will have the option to earn elective credit and 4Cs credit concurrently.

Mat-Su iTech

Mat-Su iTech is an MSBSD program which offers online courses through eDynamic and Apex Learning. It is available at all traditional and nontraditional high schools in the District. With the assistance of on-site mentors and highly qualified virtual teachers, students have the opportunity to complete courses at their own pace. iTech offers credit recovery, regular credit accrual, and acceleration. Please contact your school counselor for more information.

FY23 iTech Catalogs: [Apex Learning](#) | [eDynamic Learning](#)

ANSEP Acceleration Academy (Mat-Su)

The Acceleration Academy (Mat-Su) is an innovative partnership between the Alaska Native Science & Engineering Program (ANSEP) and the Matanuska-Susitna Borough School District (MSBSD). It is a full-time, regular high school with the additional benefit that students who participate will have the opportunity to graduate from high school early with two years or more of college credits earned toward BA and BS degree programs. MSBSD students will begin taking college courses the moment they begin high school and will have the ability to accumulate college credits that apply towards many degree programs at the University of Alaska. The course and schedule options will ensure that MSBSD students will be academically college-ready by the end of year three, while an optional fourth year will allow students to earn additional college credits.

The ANSEP Acceleration Academy (Mat-Su):

- Supports students of all career interests,
- Significantly improves college readiness by eliminating the need for remediation,
- Produces high school graduates with two or more years of college credits earned for various degree programs,
- Reduces the time to degree for college students,
- Saves families two years or more in college costs,
- Saves the State of Alaska millions of dollars in general fund support, and
- Increases the economic opportunities for MSBSD students and their families.

Notes and Contact Information:

- Application required for admission.
- Phone: (907) 786-1158
- Email: [UAA ANSEPAcceleration@alaska.edu](mailto:UAA_ANSEPAcceleration@alaska.edu)
- Website: <https://www.ansep.net/>

Academy of Blended Learning Education (ABLE Program)

ABLE is a proven school-within-a-school model of credit recovery for students at-risk of not graduating on time for 11th and 12th grade students. ABLE is a self-paced, individualized learning center with a professional, structured environment where students receive one-on-one help and work at their own pace on one to two classes at a time.

As soon as a student completes a class, they are given the next class they need until all of their credits are either caught up or they graduate. Students must earn at least a 70% to progress from one class to the next. The day a student graduates, he/she is done and does not have to return to school.

For juniors, ABLE is meant to be a temporary change in their high school career that would, otherwise, turn into a five year tenure. As soon as the junior is caught up enough in credits, he/she will return to their original program or school the next semester.

ABLE provides all students with a mentor teacher to help guide them and to provide academic support and tutoring when needed. Students will have the option of taking academic support classes to help build skills so they can successfully handle any obstacle they may encounter in their classes. All courses are blended from different sources, including Apex, to meet students where they are at so they can work independently, while help is always available within the room.

Note: Courses taken in the ABLE Program are not NCAA eligible.

[Click here](#) for more information on the ABLE Program.

Other Credit Options (OCO) ([BP 6146.02](#))

Other Credit Options (OCO) is designed to give students the opportunity to choose learning experiences that are suited to their personal educational needs. The Board values other ways to accomplish learning experiences but OCOs are not shortcuts to learning. Student experiences need to include demonstration of competency to a mastery level. The Chief School Administrator/Superintendent will design a structure to support OCO within the boundaries set by Board policy.

Students wishing to take courses for high school credit through one of the following Other Credit Options may do so with prior school counselor and principal approval:

- [AR 6146.02](#) (a) Distance Delivery
- [AR 6146.02](#) (b) College Course Work
- [AR 6146.02](#) (c) Early College Admissions
- [AR 6146.02](#) [d] Independent Study
- [AR 6146.02](#) [e] Educational Travel
- [AR 6146.02](#) [f] Community Service
- [AR 6146.02](#) [g] Early High School Credit
- [AR 6146.02](#) [h] Physical Education Credit Waiver
- [AR 6146.02](#) [i] Supplemental and Non-public School Credit
- [AR 6146.02](#) [j] College-Level Examination Program (CLEP)
- [AR 6146.02](#) [k] Test for Credit

The student must complete the appropriate OCO Form with assistance from the school counselor/principal. After obtaining school- level and parent signatures, the original OCO Form needs to be filed in the student's cumulative file and a copy kept

with the student's counselor for transcript review purposes. If an OCO is denied, a student and parent/guardian may appeal the decision to the Office of Instruction within five (5) days of the decision. A determination by the Office of Instruction will be made in five (5) working days. These deadlines can be extended upon the mutual agreement of parties involved.

1. Students are encouraged to complete Other Credit Options four (4) weeks prior to the end of the semester. It is the responsibility of the student to know and to meet individual school deadlines.
2. Other Credit Options are only recorded on the transcript after an official transcript has been received. Once the OCO credit is recorded on the transcript, it is included in calculating grade point average (GPA) and class rank.
3. The MSBSD is not the sponsoring agency for the off-campus programs and is not responsible for the student's personal or financial liability. Expenses for Other Credit Options are the responsibility of the individual.
4. Since Other Credit Options are recorded only upon program completion, OCO is not a course that can be included for calculating eligibility for full-time student status.
5. Weighing the impact of OCO on co-curricular eligibility (MSBSD, ASAA, NCAA, etc.) is the responsibility of the student.
6. To further support students choosing learning experiences to enhance their personal educational needs, counselors and principals, along with students and their parents/guardians can apply for consideration to the Office of Instruction for an OCO that has not been established by these guidelines. The OCO Form IO: Application for Consideration should be used for this process.

APS

The Alaska Performance Scholarship provides an opportunity for Alaska high school students to earn a scholarship to help cover the cost of an Alaska postsecondary Education. Alaska high school students who take a more rigorous curriculum, get good grades, and score well on college placement or work ready exams, can earn a Alaska Performance Scholarship to qualified Alaska colleges, universities, or vocational/technical programs. To learn more about the Alaska Performance Scholarship, [click here](#) to visit their website.

[Click here](#) to view the 2022-2023 MSBSD APS Reference Chart.

MTSS

Multi-Tiered System of Supports (MTSS) is a systemic, continuous-improvement framework in which data-based problem solving and decision-making is practiced across all levels of the educational system for supporting students. MTSS takes a proactive approach to identifying students with academic or behavioral needs. The key components of MTSS include:

- Universal screening of all students early in the school year
- Tiers of instruction that support each student's individual needs
- Ongoing data collection and continual assessment to guide instruction
- Schoolwide approach to expectations and supports to support all learners

[Click here](#) to learn more about MTSS in the Mat-Su Borough School District.

Enrollment of Foreign Students [\(AR 5119\)](#)

MSBSD Students Participating in Foreign Exchange Program

Foreign exchange student programs are recognized as a means of improvement of international understanding. The exchange of culture through a student exchange program is viewed as a desirable supplement to the educational program. If a student is contemplating an outbound exchange, they should take the following steps prior to the exchange:

1. Initiate a conference to include the student, parent/guardian, and counselor. In this meeting the student's transcript will be evaluated and a written plan for graduation will be documented. It is possible that students may need to take correspondence course(s) while on an exchange in order to complete all of the graduation requirements. A copy of this plan and needed documentation from the school attended in the foreign country will be given to the student and parent/guardian.
2. To earn credit from the foreign exchange program, the student must return with an official transcript and a course outline for each course completed. The course outline will be used to determine whether the course meets a core academic requirement or an elective credit.
3. If an official transcript is not producible, then credit will be determined by reviewing course outlines (signed by a foreign school official), length of time in each course, and student performance.
4. School calendars and grading systems vary from country to country; therefore, each foreign exchange transcript must be evaluated on a case-by-case basis. It is highly recommended that the student return with an official transcript, course descriptions, school calendar, and any other supporting documentation that would assist the MSBSD in awarding credit.

If the student does not comply with the above requirements and records are either not provided or are incomplete, the student may risk not earning credits needed for graduation.

For additional information on enrollment of foreign students [click here](#) to review BP 5119.
