

Ron L. Larson Elementary | 907-352-2300 | 2722 E. Seldon Rd. | Wasilla, Alaska 99654

November 20, 2020

Larson Families,

Today a case of COVID-19 was reported at Larson Elementary. Mat-Su Public Health was notified and is working through the contact tracing process. Potential close contacts are being contacted and will participate in At-Home learning until Mat-Su Public Health completes contact tracing.

For all students and staff who are not identified as a potential close contact (within 6 feet for more than 15 minutes) school will resume on November 30 (due to the all-district closure Nov. 23-25).

Once identified, close contacts will need to quarantine for 14 days from the date of last contact and monitor for symptoms. Families should consider testing seven (7) days after exposure, or if symptoms develop. A negative test will not reduce the time of an individual's quarantine.

Consistent with Larson's COVID-19 Mitigation Plan, the school facility and all buses are cleaned and disinfected daily.

Please review the District's [Keeping Students Safe & Schools Open](#) flyer and continue to monitor your child for symptoms before the start of school each day. For any questions, please contact our front office at (907) 352-2301.

Sincerely,

Beckie Murphy
Principal
