

Adding a User Profile in Chrome

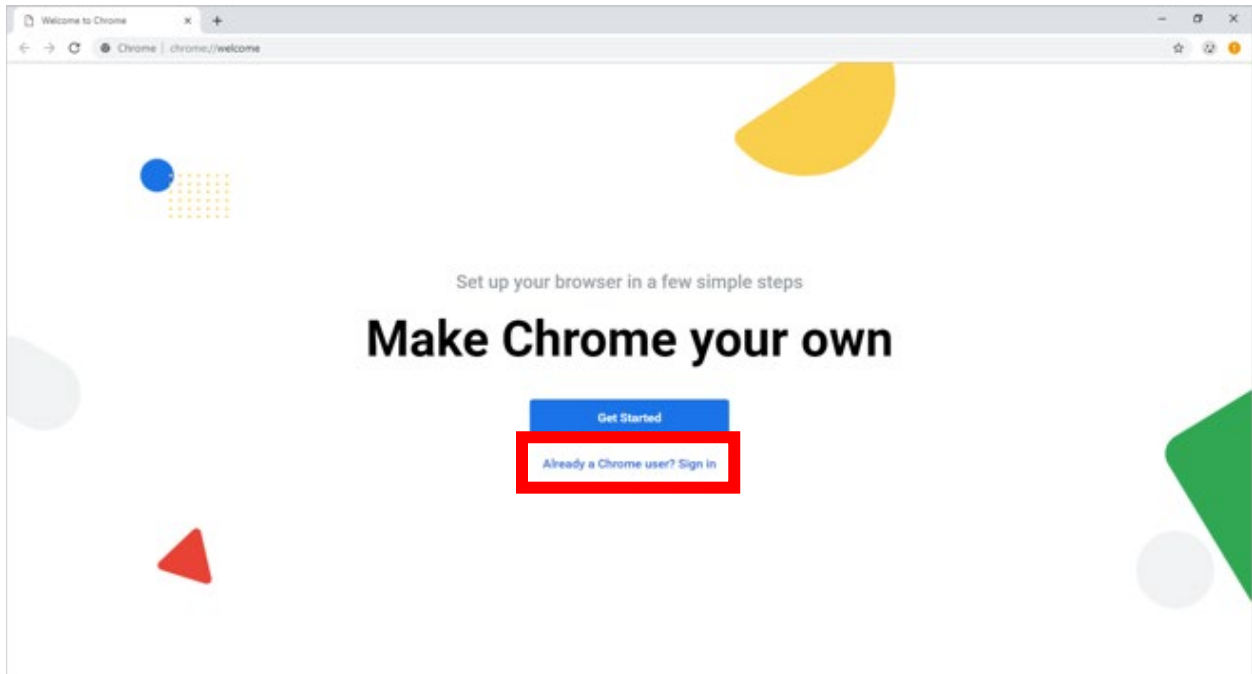

- Open Google Chrome on your PC and click the profile (avatar) icon on the right edge of the address bar.
- Select the “+ADD” link to open the user / people management window.

- Enter the name of the profile and select an icon for the user. If you want to create a desktop shortcut for the user (I RECOMMEND DOING THIS!), click to tick the option and then click the “Add” button.

- This will open a new browser window

- Click on “Already a Chrome User? Sign In”
- Enter an email address (example: ab123456@apps.matsuk12.us) and password for the user and click “Next”.

A screenshot of the Chrome sign-in page. At the top is the Google logo and the word "Welcome". Below that is a dropdown menu for email, showing "xxxxxx@gmail.com" with a dropdown arrow. Underneath is a password input field with the label "Enter your password" and a masked password ".....". To the right of the password field is an eye icon to toggle visibility. At the bottom left is a link for "Forgot password?" and at the bottom right is a blue "Next" button.

- Click “Yes, I’m in” to activate sync across your other devices.

Turn on sync?

Sync your bookmarks, passwords, history, and more on all your devices
Google may use your history to personalize Search, ads, and other Google services

You can always choose what to sync in settings.

- Now you have set up the new user profile and it will maintain its settings and data separately.

Managing User Profiles in Chrome

- To switch from one user profile to the other, click the profile icon and choose the account you want to open. OR you can double click on the icon on your desktop with that person's name.
